

Columbia Heights Schools Reference Letter

In an attempt to reduce our terrazzo floor maintenance costs we tried the Apeiron 2 Step Stone Care System in the entry hall of our Senior High School. It was immediately apparent that the system restored the original look of the terrazzo floor and was an easy system to use. We watched the area over the winter months and noticed how easy the area was to maintain.

In the spring of the following year the area still looked as good as the day the system was installed. Since the system did not leave any polymer on the floor like floor finish does, we did not have the time and expense of stripping and refinishing.

We have now used the system throughout the entire Senior High School. The floor surface looks better than it has in years. The system has reduced our floor maintenance costs. The time savings has allowed me to use our staff for other projects and has expanded the use of our budget. We have now scheduled to use the system in other schools in our district.

The system truly works with the natural beauty and durability of the terrazzo floor. The maintenance is simply dust mopping and auto scrubbing on a regular basis. We do not have to strip and refinish the floors anymore.

Sincerely,
